

Power Unit HTP-2000

Reduces Tensioning Time By Up To 50%

Model Number	HTP2000
Type	Air
Requirement	75cfm @100psi
Maximum Pressure (psi)	30,000psi
Oil Delivery (Cubic Inches/Min.) @ No Load @Full Pressure Per Stroke ci	32 16 .123
Motor Size (Hp)	1.5
Air Piston Diameter	7"
Stroke	2.5"
Hydraulic Piston Diameter	.25"
Reservoir Capacity (Gallons)	2.5
Dimensions (Inches) Length Width Height Weight (With Oil) Lbs.	19.5 19.5 19.5 120
Valve Type	Manual

Features:

HTP-2000 dual hydraulic power unit, air operated, complete with air driven vacuum return pump.

Includes: filter, regulator, lubricator, 30,000 psi gauge, 2.5 gallon reservoir, pressure control needle valve and features an air driven vacuum return pump.

All contained in a rugged stainless steel tubular frame for maximum component protection.

For use with all variable, fixed and multiple tensioner systems.
