

Multi-Step Safety Block

S10K-SB Safety Block for AutoSPREADER

The S10K-SB Safety Block offers the following features to enhance the safe and efficient operation of the AutoSPREADER Flange Spreader.

MULTI-STEP DESIGN

- Each safety block has three steps: 1", 2", 3"
- This allows the operator to choose the width of flange separation.

EASY GRIP HANDLE

- The handle allows the operator to easily grip the safety block, even when wearing gloves.

LIGHT WEIGHT

- The aluminum block is light weight and easy to handle.

SECURE SUPPORT

- After the AutoSPREADER opens the flange, the S10K-SB Safety Blocks are inserted in the gap between the flanges. The flange spreaders are then closed to transfer the load to the safety blocks, enabling the operator to work more safely on the gasket surfaces.
